### **Bauer In-House Exhibition 2026: 1,200 Guests Expected from Germany and Abroad – 50th Anniversary of Rotary Drilling Rigs**

**Schrobenhausen, Germany** – BAUER Maschinen GmbH is once again inviting guests to its traditional in-house exhibition in 2026. This year's event is themed "Born in Drilling, Growing for the Future." It will run from Thursday, April 16, through Saturday, April 18. Approximately 1,200 guests from Germany and abroad are expected to attend. This will once again make Schrobenhausen an international hub for the specialist foundation engineering industry.

During the three-day event for invited guests, groundbreaking technologies, the latest machinery, and forward-looking solutions for the industry will be presented. In addition to the exhibition, live demonstrations will also take place in nearby Aresing. Preparations are already in full swing on the grounds of Bauer's headquarters.

This year's event centers on a special anniversary: 50 years of Bauer rotary drilling rigs. With the market launch of the BG 7 in 1976, the company set new standards in specialist foundation engineering. Instead of just two piles per week, this groundbreaking innovation made it possible to install several piles per day. What was originally designed for the company's own use quickly developed into a successful product series and continues to shape the industry to this day.

Martin Thormann, Member of the Executive Board of BAUER AG and responsible for the Equipment segment, says: "For 50 years now, Bauer Maschinen has been setting milestones in specialist foundation engineering, starting with the invention of the rotary drilling rig, which has transformed the industry. We would like to celebrate this anniversary together with our guests at the in-house exhibition."

In addition to Bauer Maschinen, other well-known companies and brands within the group will be represented at the 2026 in-house exhibition, including BAUER MAT Slurry Handling Systems, EURODRILL GmbH, GEFCO, GERMAN WATER and ENERGY GROUP (GWE), KLEMM Bohrtechnik GmbH, RTG Rammtechnik, and SPANTEC Spann- und Ankertechnik GmbH.

### **About BAUER Maschinen Group**

For almost 60 years, equipment from Bauer has represented the highest performance and quality and constant innovation. The BAUER Maschinen Group is the world market leader in the development and manufacture of specialist foundation engineering equipment. BAUER Maschinen GmbH, which is also the holding company for a number of subsidiaries, designs and builds large-diameter drilling rigs, duty-cycle cranes, trench cutters, grabs and vibrators as well as the related tooling at its plants in Schrobenhausen, Aresing and Edelshausen. The subsidiaries manufacture state-of-the-art mixing and separation equipment as well as rotary drive systems and equipment for drilling small-diameter boreholes and wells. The BAUER Maschinen Group also operates manufacturing facilities in the USA, China, Malaysia, Singapore and Turkey. A component supplier within the Group is Schachtbau Nordhausen. The company operates a global sales and service network. More at <https://equipment.bauer.de/en>.

### **About Bauer**

The BAUER Group is a leading provider of services, equipment and products dealing with ground and groundwater. The Group can rely on a worldwide network on all continents. The Group's operations are divided into three forward-looking segments: Geotechnical Solutions, Equipment and Resources. Bauer profits enormously from the collaboration of its three business segments, enabling the Group to position itself as an innovative, highly specialized provider of products and services for demanding projects in specialist foundation engineering and related markets. Bauer therefore offers suitable solutions to the world's greatest challenges, such as urbanization, the growing infrastructure needs, the environment, as well as water. The BAUER Group was founded in 1790 and is based in Schrobenhausen, Bavaria. In 2024, it employed about 11,000 people and achieved total Group revenues of EUR 2.2 billion worldwide.
